

Guide for E-mail in Thunderbird

1. Open up your thunderbird application and press Email at the start screen.

Thunderbird Mail - Lokala mappar

2. After you've pressed Email, write in your Name, Email address and Password. Then press Continue

3. After a short while thunderbird will say that it can't connect with these settings and you need to input the IMAP and SMTP settings yourself.

For IMAP write: post.intendit.se – Use port 993 and SSL/TLS, also make sure to use “Normal Password” for Authentication

For SMTP write: post.intendit.se – User port 2525 and Choose STARTTLS, also make sure to use “Normal Authentication”

Set Up an Existing Email Account

Your name: Your name, as shown to others

Email address: Your existing email address

Password: Remember password

The following settings were found by probing the given server

	Server hostname	Port	SSL	Authentication
Incoming:	IMAP <input type="text" value="post.intendit.se"/>	993 <input type="text"/>	SSL/TLS <input type="text"/>	Encrypted password <input type="text"/>
Outgoing:	SMTP <input type="text" value="post.intendit.se"/>	2525 <input type="text"/>	STARTTLS <input type="text"/>	Normal password <input type="text"/>

Username: Incoming: Outgoing:

4. Now press done and your email is now ready to use
